## Application for a start-up grant (deadline 30 April 2016)

These grants (up to 7 500 €) are targeted at postdocs within the QUTIF network or PhD students in the final stage of their PhD phase. The goal is to enable the candidates to pursue small-scale research ideas independently and to train them in proposal writing, as a preparation for larger proposals. Possible items are:

- small equipment,
- science-related or soft-skill related travel and participation costs,
- hiring of student personnel.

Please use the form below or prepare your application along these lines. In addition, the application must include:

- a mini research plan of ca. 2 pages,
- a 1-2 page CV,
- for candidates who do not have earned their PhD degree yet: statement of support by a senior QUTIF participant.

Please send this application to the coordinator. The steering committee will decide on the applications after the deadline.
